## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group II Laser Apparatus in Paper No. 10032003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 45 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 45, line 2, "meands" should be -means-.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44-52 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,358,806 to Haraichi et al. Haraichi et al describe (column 6, line 32+) laser beam machining comprising comparing a laser beam reflected during machining with a reference laser beam. Haraichi et al further describe (column 20, line 34 through column 21) monitoring of the machining depth using a processor 69 (Figure 22).

Art Unit: 1725

Applicant's apparatus claims comprise numerous method limitations which do not impart patentability to the apparatus structure.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to laser machining and monitoring.
